

Before assembly

- We recommend that time is taken to read the instructions before starting assembly, then follow the easy step by step guide. The instruction sheet is only a guide to the assembly. Certain items may not be shown to scale.
- Check all components prior to assembly
- This product should be assembled by no less than two people
- Drill all components where indicated

Recommended tools for assembly

- Power Drill/Screwdriver
- Cross-head drill bit
- 3mm diameter drill bit
- Tape measure
- Spirit level

Biocidal Products Regulation EU 528/2012

Wolmanit® CX treated wood, is a treated article incorporating biocidal products: copper hydroxide carbonate, bis(N-cyclohexyl-diazonium-dioxy)-copper and Boric Acid. They protect wood against fungal decay, rot and insect attack. Wear gloves when handling freshly treated wood. Avoid breathing dust when cutting wood. Dispose of off-cuts responsibly.

No.	Components	Qty.
1	Front side upright (1428mm)	2
2	Rear side upright (1670mm)	2
3	Front centre upright (1400mm)	1
4	Rear centre upright (1642mm)	1
5	Side panel	2
6	Back panel	2
7	Centre support rail	2
8	Short shelf support (45x28x470mm)	1
9	Long shelf support (45x28x810mm)	1
10	Floor/Shelf	3
11	Roof rear strip (16x45x1020mm)	2
12	Roof panel	2
13	Fascia arch	2
14	Fascia support block (28x28x95mm)	4
15	Floor/Shelf fascia (21x70x880mm)	3
16	Bargeboards	2
17	Finial	1

No.	Fixing Kit	Qty.
18	Metal L-bracket	4
19	60mm Screw	32
20	50mm Screw	30
21	40mm Screw	45
22	32mm Screw	32

1. Side panels and uprights

No.	Components for this section	Qty.
1	Front upright (1428mm)	2
2	Rear upright (1670mm)	2
5	Side panel	2

Fixings for this section	
19	60mm screws
12	

2. Back Panels

No.	Components for this section	Qty.
4	Rear centre upright (1642mm)	1
6	Back panel	2

Fixings for this section	
19	60mm screws
12	

3. Shelf Support Rails

No.	Components for this section	Qty.
3	Front centre upright (1400mm)	1
7	Centre support rail	2
8	Short shelf support (45x28x470mm)	1
9	Long shelf support (45x28x810mm)	1

Fixings for this section		
18	Metal L-bracket	4
21	40mm screws	6
22	32mm screws	16

The shelf can be set at any height and on either side of the log store. These instructions show the shelf being fitted to the left-hand side. To fit to the right-hand side, fit the shelf support rails (8,9) to the right-hand, back and side panels.

Fit the Shelf support rails at the desired height. Secure through the panel cladding into the support rails. Ensure all rails are level and at the same height.

The top edge of the centre support rails must be level with the top edge of the shelf support rail.

The top edge of the centre support rails must be level with the top edge of the back panel bottom frame.

4. Floor & Shelf

No.	Components for this section	Qty.
10	Floor/Shelf	3
15	Floor/Shelf fascia (21x70x880mm)	3

Fixings for this section		
20	50mm screws	30
21	40mm screws	9

To fit the floor and shelf, it may be easier to carefully lay the unit on its back to allow better access to the screws.

Position the shelf inside with the top of the Shelf flush with top edge of the shelf support framing.

Position the floors inside with the top of the floor flush with top edge of the side and back panel framing.

View of underside of shelf
Secure through the shelf frame into the shelf support rails.

Secure through the floor frame into the panel frame.

5. Fascia Arch

No.	Components for this section	Qty.
13	Fascia arch	2
14	Fascia support block (28x28x95mm)	4

Fixings for this section		
21	40mm screws	16

6. Roof & Bargeboards

No.	Components for this section	Qty.
11	Roof rear strip (16x45x1020mm)	2
12	Roof	2
16	Bargeboards	2
17	Finial	1

Fixings for this section		
19	60mm screws	8
21	40mm screws	14

Important information - retain for future reference

Pressure treated buildings require no further preservative treatment, However they can be painted or stained if required.

Timber Information.

As timber is a natural material, there are certain weather conditions that may affect the materials properties. In times of excessive dry spells the material may lose some of its internal moisture causing a certain degree of shrinkage on a panel and in periods of excessive rain there will be a certain amount of swelling throughout the wooden panels. This process can not be avoided. If you have problems with certain boards shrinking in dry spells try to decrease the amount of direct sunlight on the building or the amount of air passing over the building.
